4.2	List of participating municipalities.....	11

This is the fourth annual report of solidarit'eau suisse, covering the period January to December 2011.

## 1 Institutional setup

### 1.1 Steering Committee

The Steering Committee (SC) consists of the SDC and “champions”, i.e. municipalities and water utilities which commit themselves to actively promote solidarit'eau suisse in their region. To complement the SC the NGOs are also represented. Each organisation has up to three members (one or two representatives and one deputy) in the SC. Currently the SC consists of:

- Manfred Kaufmann, Swiss Agency for Development and Cooperation (SDC), chairman
- François Muenger, Swiss Agency for Development and Cooperation (SDC)
- Vanessa Fakhry, eauservice Lausanne
- Julie Bergamin, eauservice Lausanne
- Henri Burnier, eauservice Lausanne
- Armon Hartmann, Kommission für In- und Auslandhilfe Münsingen
- Markus Sterchi, InfraWerke Münsingen
- Pierre Kistler / Herbert Reithmayr, Swissaid
- Thomas Streiff, BHP – Brugger and Partners Ltd.
- Monika Trost, BHP – Brugger and Partners Ltd.
- Claudio Valsangiacomo - University of Applied Sciences and Arts of Southern Switzerland

Herbert Reithmayr joined the SC to succeed to Pierre Kistler but resigned from the SC because he has a new job in Austria. Swissaid will propose a successor for him for the SC for 2012.

As a new member of the SC, Claudio Valsangiacomo represents the communities and the canton of Ticino and Swiss academia dealing with water (CV works for the Director's Conference of Swiss Universities of Applied Sciences and at the SUPSI).

The SC met in 2011 in February, April, August and November to inform about the activities of each member, to decide on targets and marketing activities and to monitor the progress.

The SC presidents' status is “primus inter pares”. The SDC places the presidency at all time.

Only municipalities that really get involved with solidarit'eau suisse and invest time and money will be invited to take part in the SC. Once a municipality decides to no longer support the initiative it must withdraw from the SC. The committee has to be notified six months in advance of any decisions.

NGOs can only take part in the SC if at least one project is on the website and if they are engaged in solidarit'eau suisse and promote the initiative actively. The NGO has to actively demonstrate an interest in taking part in the SC.

Alliance Sud, the Swiss Alliance of Development Organisations (Helvetas, Swissaid, Fastenopfer, Brot für Brüder, Caritas, Heks) is the common platform for development policy lob-

bying by the six leading Swiss development organisations. Alliance Sud therefore can not be represented in the SC.

## **1.2 Secretariat**

The secretariat of solidarit'eau suisse is with BHP – Brugger and Partners Ltd. The secretariat is responsible for the maintenance of the website, promotion of solidarit'eau suisse through mailings, marketing activities, information and communication with interested and participating municipalities / water utilities, coordination and organisation of events and meetings. It is the contact point for the experts of the Aguasan Group, the municipalities and water utilities and the NGOs. The secretariat is responsible for the publication of articles in journals and newspapers, as well as press releases and maintaining a good relationship with the media.

## **1.3 Aguasan Group**

The role of the Aguasan experts is to review the project proposals submitted by NGOs before they are published on the website. In case of unknown small NGOs the experts review the project proposal in line with the criteria for the approval of Non Profit Organisations. Without a positive second opinion the project will not be published on the website.

## **1.4 NGOs**

The Development Agencies play a key role in the solidarit'eau suisse platform and can get a direct benefit. In December 2011 in total 22 NGOs participated with solidarit'eau suisse. All NGOs based in Switzerland are free to submit water projects and water projects with sanitation aspects or watershed management aspects.

## **1.5 Patronage committee**

The patronage committee (PC) consists of (former) politically active persons. Though it is not expected of them to actively promote solidarit'eau their role is to act as a sort of reference or honest broker of this initiative. They are informed about their position and in the case of Federal Councillor Johann Schneider-Ammann his personal assistant approached at the assumption of his post the secretary of solidarit'eau in order to clarify his role.

Currently the PC consists of:

- Franz Blankart, former State Secretary
- Christine Egerszegi-Obrist, Member of the Council of States
- Brigitta M. Gadiant, Member of the National Council
- Kathrin Hilber, Member of the Governing Council, Canton of St. Gall
- Rudolf Joder, Member of the National Council
- Johann Schneider-Ammann, Federal Councillor
- Chiara Simoneschi-Cortesi, former Member of the National Council
- Carlo Sommaruga, Member of the National Council
- Simonetta Sommaruga, Federal Councillor
- Hansruedi Stadler, former Member of the Council of States
- Doris Stump, former Member of the National Council
- Alexander J.B. Zehnder, former President of the ETH Council

## 2 Communication / Marketing Activities

### 2.1 Marketing of solidarit'eau suisse

#### 2.1.1 Flyer

The flyer gives a good overview over the initiative and its mechanism. It was produced in June 2007 in German and French. Since autumn 2008 it is available as well in Italian. Additionally, A5 pages enclosed with the flyer document current projects and partnerships. In 2010 the French flyer has been slightly adapted and reprinted in August. All of the A5 pages have been revised and printed in December 2010. They document:

- support of a project: The success of the Swissaid project in Guinea-Bissau.
- municipality partnerships: The collective engagement of eauservice with several municipalities
- support through partnership: The partnership of Münsingen with Madagascar

All of them are available for download on the solidarit'eau suisse website.

For a better visibility at presentations or media conferences the secretariat ordered a 1x2 meter banner. In 2011 it was used at the media conferences in Samedan and in Locarno.

#### 2.1.2 Individual communication

The initiative has been communicated to the municipalities and water utilities by personal emails, telephone calls and personal contacts at events and meetings. Although personal contact is time consuming it is very important. This meeting allows us to explain the idea in more detail and to answer to questions of the projects. Individual communication with people helps them to understand the purpose and importance of solidarit'eau suisse.

As an effective tool of individual communication solidarit'eau suisse ambassadors were nominated. An ambassador is a credible personality with a vast federal, cantonal and/or communal network and who is personally committed to water related engagements for disadvantaged people in the South. Her/his role is this of a "door opener" by actively promoting solidarit'eau within hers/his network. The Steering Committee of solidarit'eau suisse decides on and approaches potential ambassadors.

Alexander Tschäppät (mayor of Berne) confirmed that he is prepared to fulfill the role of an ambassador of solidarit'eau suisse for the German speaking part of Switzerland. As a spokesman, he plans to promote solidarit'eau suisse in organizations such as the Association of Swiss Cities (Städteverband), the Association of Swiss Municipalities (Gemeindeverband), Conference of the Region (Regionalkonferenz), and Capital Region (Hauptstadtregion) during 2012.

Ernst Bromeis – a professional swimmer and ambassador for conserving water resources – plans to swim down the whole river Rhine from the Grisons to Rotterdam in 2012. He expressed a great interest in being a solidarit'eau suisse ambassador.

#### 2.1.3 Mailings

In 2011 solidarit'eau suisse did one mailing for the International Water Day in March to all the municipalities that currently participate or participated in the past. Referring to this mailing all of the municipalities were contacted. Thanks to this letter, some of the former participants have been reactivated. Further to this, solidarit'eau shows short stories of the supported projects on its website.

To establish a constructive relationship with the NGOs of solidarit'eau suisse, the secretariat did a mailing to all partner NGOs. The mailing contained information on the process of solidarit'eau suisse and intended to point out the benefit of this relationship for the NGOs. In an individual follow-up all NGO have been contacted by telephone and mail. Some NGOs wished a personal meeting.

### 2.1.4 Events

At the following events, solidarit'eau suisse, its background and functionality, has been presented:

March:	Marche pour l'eau (SIGE), Geneva
April:	Exposition on water (eauservice, Lausanne), Lausanne
May:	Program in Radio Suisse Romande
June:	Suisse Public, Bern
August:	Annual conference of SDC, Lausanne
September:	Media conference (in the context of the 40th anniversary of diplomatic relationships between Switzerland and Vietnam; handing over of the label), Bern
September:	Wassertage Samedan (stand to promote s'eaus in Grisons, handing over of the label), Samedan
October:	100 year jubilee of the water supply, Les Ponts-de-Martel (handing over of the label)
December:	Media conference with the water services of Locarno and the NGO FSM (handing over of the label), Locarno

Since July 2011 the mobile stand realized and used during the "Sommet de la Francophonie" in October 2010 with information about solidarit'eau has been used by municipalities to promote Solidarit'eau. The stand is at the moment hosted by **eauservice**.

### 2.2 Articles published in 2011

January:	aqueduc.info
March:	Eine Welt
March:	aqueduc.info
June:	Schweizer Gemeinde
September:	Anzeiger Region Bern
September:	Der Bund
September:	Engadiner Wochenzeitung
September:	Die Südostschweiz
September:	Südostschweiz Regionalportal
October:	Schweizer Gemeinde
October:	L'Impartial
December:	La Regione
December:	Corriere del Ticino
December:	Il Giornale del Popolo

The listed publications are available on the website:

[http://www.solidariteausuisse.ch/de/artikel.html?no\\_cache=1](http://www.solidariteausuisse.ch/de/artikel.html?no_cache=1)

## **2.3 Forms**

### **2.3.1 Project forms**

The project forms are available for download on the solidarit'eau suisse website:

<http://www.solidariteausuisse.ch/de/downloads-links.html>

### **2.3.2 Reporting**

The reporting form, which NGOs have to fill in at the end of the project, has been slightly adapted to simplify the completion by the NGOs. This report guarantees consistent feedback of the projects and enables a high standard to be maintained. The reports are on the website of solidarit'eau Suisse (<http://www.solidariteausuisse.ch/de/projekte/abgeschlossene-projekte.html>).

### **2.3.3 Label policy**

solidarit'eau suisse defined criteria to award the label "municipality solidarit'eau suisse". The following criteria have been introduced:

- The municipality spends at least one cent/qm used water
- The amount has to be contributed to a solidarit'eau water project which may contain sanitation aspects or watershed management aspects.

The municipalities which support projects with less than one cent/qm water used do not receive the label. They are welcome to promote their support of solidarit'eau suisse. The committee decides on the allocation of the label.

### **2.3.4 Criteria for the approval of Non-Profit Organisations**

In 2009 solidarit'eau suisse created and introduced the following criteria for quality reasons:

- the organisation has to be based in Switzerland
- the organisation has to have a legal form as a non profit organisation
- the organisation has to hold the label ZEWO or is member of one of the federations, which are responsible for the according project
- the organisation has to account for the expertise in the water sector
- the organisation has to commit to follow the rules regarding the project presentation, reporting and finances.
- the organisation has to follow the recommendation for non profit organisations in their accounting and the annual report will be audited by an independent audit company.

During the reporting year these criteria have been consequently applied and there was no evidence to modify/extend them.

### 2.3.5 Federation Guarantee for small NGOs

In 2011 the SC decided, that small NGOs that can not be accredited by solidarit'eau suisse can let their federation guarantee for their water project. The federation has to sign a form in which it has to sign a guarantee for a small NGO who can then present a project on the solidarit'eau suisse platform (after a positive second opinion by the water expert).

The Federation has to accredit itself by filling in the official solidarit'eau suisse-form and assign a water expert for the second opinion of the projects of small NGOs.

The form and the regulations are on the platform for download.

### 2.3.6 Guidelines for private contributions:

In 2011 the SC decided that private financial contribution will be possible, if a municipality asks for financial support of a local company. Solidarit'eau suisse will communicate the partnership with the municipality or water supply but will neither communicate the amount nor the contribution of the private company. With the approval of the municipality/water supply the private company can communicate its contribution with the following claim: "Die *Gemeinde X* wurde in ihrem Engagement bei solidarit'eau suisse von *Firma Y* unterstützt." / "La *commune de X* a bénéficié du soutien de *l'entreprise Y* dans son engagement au sein de « solidarit'eau suisse »." / "Il *Comune di X* ha beneficiato di un contributo da parte dell'*azienda Y* nel suo impegno in seno a « solidarit'eau suisse »."

The guidelines are published in the download section of the website.

## 3 Cooperation with other institutions

### 3.1 Cooperation with *Fédérations-romandes*

The Federations agreed to cooperate with solidarit'eau suisse in matters of smaller NGOs without ZEWO label. The process has been defined and is published on the website of solidarit'eau suisse. A water expert of Fédévaco has been accredited by Aguasan in December 2011.

### 3.2 Cooperation with *FOSIT*

The 'lettre d'intention' of solidarit'eau suisse and the Federations has also been approved by FOSIT. A water expert of FOSIT has been accredited by Aguasan in December 2011.

Together with FOSIT and Claudio Valsangiacomo the secretariat planned a media conference with the water service of Locarno and the NGO Fondazione Svizzera Madagascar (FSM), which was held in December 2011.

### 3.3 Cooperation with *SVGW*

The secretariat decided to send a letter to all Water suppliers in Switzerland to motivate them to contribute to a water project of solidariteau suisse. The SVGW cooperated with a list of all their members und agreed to co-sign the letter. The mailing will be sent out in March 2012 with reference to the World Water Day on the 22<sup>nd</sup> of March.

### 3.4 Public-Public Partnerships supported by SDC

The public-public partnership is a long-term partnership between Swiss municipalities/utilities and municipalities/utilities in developing countries. This partnership should go beyond the implementation of a specific project but also include capacity development of the Southern Partner, know-how transfer and mutual exchange between both partners. Currently two Swiss municipalities (Lausanne and Münsingen) maintain such a partnership. SDC has earmarked in total CHF 100'000 to top-up the funding of Swiss municipalities for such public-public partnerships.

During the launching of the partnership in 2009 between the city of Lausanne through **eauservice** and Nouakchott (Mauritania), 7 Swiss municipalities joined the partnership. Between 2009 and 2011, 9 additional Swiss municipalities decided to join. Thanks to the contribution of the joining municipalities, the budget of eauservice could be doubled for 2011 from previously CHF 130'000 (Lausanne only) to CHF 260'000 (total 16 municipalities including Lausanne).

A first project of the public-public partnership arrangement was launched in October 2009 and was finalized in March 2011. It has reached 17'000 beneficiaries with safe access to water. Given the good results obtained in this project, the good collaboration between the partners and the needs which are still important, the Communauté Urbaine de Nouakchott CUN and **eauservice** decided to set up a second project called PCAE (Projet Communautaire pour l'Accès à l'Eau). This three year project begun in November 2011 and has a budget five times higher than the first project. SDC through a singular additional credit has committed to financially support this new public-public partnership project.

## 4 Status of NGO projects

This year, the Association Intercooperation Madagascar (AIM) and the Association Morija joined the initiative and put a water project on the website.

To keep the balance between smaller and bigger NGOs, an organisation can not have more than five project proposals on the website at the same time. During the year of 2011 the International Rainwater Harvesting Association (IRHA) and the Swiss Red Cross (SRC) could implement one or more projects thanks to the support of solidarit'eau suisse. Projects from other organisations could be partially financed.

By the end of 2011 the following development agencies have new projects on the solidarit'eau suisse website, which still seek funds:

Development agency	Project on website	Country
Association Morija	WASH Burkina	Burkina Faso
Associazione Svizzera-Cuba (ASC)	Camagüey, Cuba: potabilizzazione dell'acqua con filtri in ceramica in una comunità rurale.	Kuba
Caritas Schweiz	Mali: Nachhaltige Ernährungssicherung und Trinkwasserversorgung auf dem Plateau Dogon durch den Bau von Kleindämmen für den bewässerten Zwiebelanbau (Echaloten)	Mali
Caritas Schweiz	Nicaragua: Dörfer entwickeln sich nachhaltig	Nicaragua
Helvetas	AJIN: Trinkwassermanagement und Siedlungshygiene in drei Gemeinden in Guatemala (GA38)	Guatemala

Helvetas	Wasser und Hygiene auf Haushaltsebene	Vietnam
IRHA	Ecoles Bleues Ikorodu, Nigéria	Nigeria
SRK	Sauberes Trinkwasser und verbesserte Hygiene	Nepal
SunDance	Dörfliche Wasserversorgung mit einer solar betriebenen Trinkwasseranlage in Tonokalacoro / Sikasso / Finkolo /MALI	Mali

The following list shows the projects that have been financed (not yet realised) thanks to the support of solidarit'eau suisse:

Development agency	Project	Country
Graine de Boabab	De l'eau potable pour la savonnerie de Ouâda et les habitations proches	Burkina Faso
Helvetas	AJIN: Trinkwassermanagement in drei Gemeinden in Guatemala (GA38)	Guatemala
Helvetas	WARM: Dorfgemeinschaften planen und realisieren Wassernutzungsprojekte in Nepal	Nepal
IRHA	Ecoles Bleues dans la commune de Kahone au Sénégal - Partie 1: Construction d'une installation de récolte de l'eau de pluie à l'école Fass Kahone	Senegal
Kommission für In- und Auslandhilfe (KIAH)	Trinkwasserversorgung und Siedlungshygiene Masindray, Madagaskar	Madagaskar
SRK	Trinkwasserversorgung in der Präfektur Shigatse, Autonome Region Tibet, China 2009-2011	China
SWISSAID	Trinkwasser, verbesserte Hygiene und Gesundheit für 11 Gemeinden in der Provinz Chimborazo (Ref. EC 2/08/01)	Ecuador
eauservice Ville de Lausanne	Projet Communautaire pour l'Accès à l'Eau (PCAEN)Nouakchott	Mauritania

The following projects have been implemented in 2011 thanks to the support of solidarit'eau suisse:

Development agency	Project	Country
IRHA	Regenwasserbewirtschaftung im Ramakrishna-Zentrum, Lucknow, Indien	Indien
SRK	Water, sanitation and health project in Nepal	Nepal
eauservice – Ville de LausanneCUN	Projet d'Amélioration de l'Accès à l'Eau (PAAE)Nouakchott	Mauritania

## 5 Participating Municipalities

### 5.1 Swiss map with participating municipalities

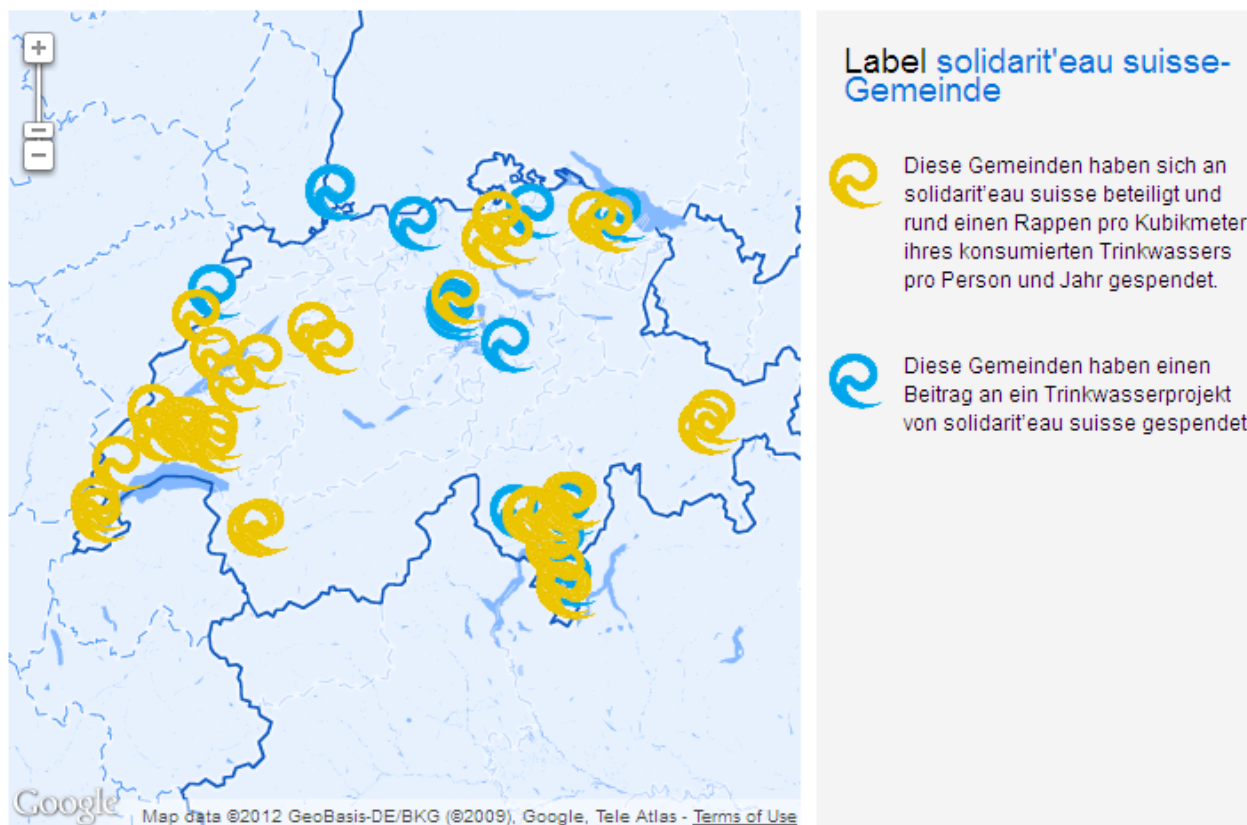

Fig.: Participating municipalities and water utilities in 2011. The Interactive map with explanation in French, German and English is available on the website (<http://www.solidariteausuisse.ch/de/solidariteau-suissegemeinden/unterstuetzende-gemeinden.html>)

### 5.2 List of participating municipalities

For lack of space the following list shows the assigned projects of each municipality for only the last three years (2009 / 2010 / 2011). For an overview of all contributions, see the previous annual reports or the Swiss map on the solidarit'eau suisse website with search function.

Municipality	Project 2009	NGO 2009	Project 2010	NGO 2010	Project 2011	NGO 2011
Abtwil-St.Josefen			Nepal	SRK	Nepal	SRK
