This is the fifth annual report of solidarit'eau suisse, covering the period January to December 2012.

1 Institutional setup

1.1 Steering Committee

The Steering Committee (SC) consists of the SDC and "champions", i.e. municipalities and water utilities which commit themselves to actively promote solidarit'eau suisse in their region. To complement the SC the NGOs are also represented. Each organisation has up to three members (one or two representatives and one deputy) in the SC. Currently the SC consists of:

- Manfred Kaufmann, Swiss Agency for Development and Cooperation (SDC), chairman
- François Muenger, Swiss Agency for Development and Cooperation (SDC)
- Julie Bergamin, eauservice Lausanne
- Armon Hartmann, Kommission für In- und Auslandhilfe Münsingen
- Martin Jovanov, Swissaid
- Thomas Streiff, BHP – Brugger and Partners Ltd.
- Silja Genoud, BHP – Brugger and Partners Ltd.
- Claudio Valsangiacomo - University of Applied Sciences and Arts of Southern Switzerland

Martin Jovanov is successor of Pierre Kistler/Herbert Reithmayr of Swissaid.

Monika Trost left BHP in June 2012 and handed over the mandate of the project manager to Silja Genoud.

The SC met in 2012 in March, June, September and December (phone conference) to inform about the activities of each member, to decide on targets and marketing activities and to monitor the progress.

The SC presidents' status is "primus inter pares". The SDC places the presidency at all time.

Only municipalities that really get involved with solidarit'eau suisse and invest time and money will be invited to take part in the SC. Once a municipality decides to no longer support the initiative it must withdraw from the SC. The committee has to be notified six months in advance of any decisions.

NGOs can only take part in the SC if at least one project is on the website and if they are engaged in solidarit'eau suisse and promote the initiative actively. The NGO has to actively demonstrate an interest in taking part in the SC.

Alliance Sud, the Swiss Alliance of Development Organisations (Helvetas, Swissaid, Fastenopfer, Brot für Brüder, Caritas, Heks) is the common platform for development policy lobbying by the six leading Swiss development organisations. Alliance Sud therefore can not be represented in the SC.

1.2 Secretariat

The secretariat of solidarit'eau suisse is with BHP – Brugger and Partners Ltd. The secretariat is responsible for the maintenance of the website, promotion of solidarit'eau suisse through mailings, marketing activities, information and communication with interested and participating mu-

municipalities / water utilities, coordination and organisation of events and meetings. It is the contact point for the experts of the Aguasan Group, the municipalities and water utilities and the NGOs. The secretariat is responsible for the publication of articles in journals and newspapers, as well as press releases and maintaining a good relationship with the media.

1.3 Aguasan Group

The role of the Aguasan experts is to review the project proposals submitted by NGOs before they are published on the website. In case of unknown small NGOs the experts review the project proposal in line with the criteria for the approval of Non Profit Organisations. Without a positive second opinion the project will not be published on the website.

1.4 NGOs

The Development Agencies play a key role in the solidarit'eau suisse platform and can get a direct benefit. In December 2012 in total 29 NGOs participated with solidarit'eau suisse. All NGOs based in Switzerland are free to submit water projects and water projects with sanitation aspects or watershed management aspects.

1.5 Patronage committee

The patronage committee (PC) consists of (former) politically active persons. Though it is not expected of them to actively promote solidarit'eau their role is to act as a sort of reference or honest broker of this initiative. They are informed about their position and in the case of Federal Councillor Johann Schneider-Ammann his personal assistant approached at the assumption of his post the secretary of solidarit'eau in order to clarify his role.

Currently the PC consists of:

- Franz Blankart, former State Secretary
- Christine Egerszegi-Obrist, Member of the Council of States
- Brigitta M. Gadiant, Member of the National Council
- Kathrin Hilber, Member of the Governing Council, Canton of St. Gall
- Rudolf Joder, Member of the National Council
- Johann Schneider-Ammann, Federal Councillor
- Chiara Simoneschi-Cortesi, former Member of the National Council
- Carlo Sommaruga, Member of the National Council
- Simonetta Sommaruga, Federal Councillor
- Hansruedi Stadler, former Member of the Council of States
- Doris Stump, former Member of the National Council
- Alexander J.B. Zehnder, former President of the ETH Council

2 Communication / Marketing Activities

2.1 Marketing of solidarit'eau suisse

2.1.1 Flyer

The flyer gives a good overview over the initiative and its mechanism. It was produced in June 2007 in German and French. Since autumn 2008 it is available as well in Italian. Additionally, A5 pages enclosed with the flyer document current projects and partnerships. In 2010 the French flyer has been slightly adapted and reprinted in August. All of the A5 pages have been revised and printed in December 2010. They document:

- support of a project: The success of the Swissaid project in Guinea-Bissau.
- municipality partnerships: The collective engagement of eauservice with several municipalities
- support through partnership: The partnership of Münsingen with Madagascar

All of them are available for download on the solidarit'eau suisse website.

For a better visibility at presentations or media conferences the secretariat ordered a 1x2 meter banner.

2.1.2 Individual communication

The initiative has been communicated to the municipalities and water utilities by personal emails, telephone calls and personal contacts at events and meetings. Although personal contact is time consuming, it is very important. This meeting allows us to explain the idea in more detail and to answer to questions of the projects. Individual communication with people helps them to understand the purpose and importance of solidarit'eau suisse.

As an effective tool of individual communication solidarit'eau suisse ambassadors were nominated. An ambassador is a credible personality with a vast federal, cantonal and/or communal network and who is personally committed to water related engagements for disadvantaged people in the South. Her/his role is this of a "door opener" by actively promoting solidarit'eau within hers/his network. The Steering Committee of solidarit'eau suisse decides on and approaches potential ambassadors.

Ernst Bromeis – a professional swimmer and ambassador for conserving water resources – acted as active solidarit'eau suisse ambassador especially in the Grisons. He handed over the labels to six new member municipalities of the Grisons (Arosa, Bever, Disentis, La Punt-Chamues-ch, Scuol and Silvaplana) during the *Wassertage* in Samedan.

Further ambassadors are planned to be recruited in 2013.

2.1.3 Mailings

In March, a mailing to all water utilities of Switzerland was sent out in collaboration with SVGW with reference to the World Water Day on the 22nd of March. As a result, four municipalities contacted the secretariat (Baar, Baden, Sempach and Stansstad) from which two municipalities decided to participate (Sempach and Stansstad). The elections on communal level in Ticino gave reason to a second mailing in September. Three new municipalities (Bauma, Bissone, Personico) joined thereupon the initiative.

2.1.4 Events

At the following events, solidarit'eau suisse, its background and functionality, has been presented:

- March: Word Water Forum, Marseille (presentation of SES mechanisms and project of Vevey and eauservice)
- March: Launching the campaign "Lausanne Eau Solidaire" on the World Water Day with an information stand*.
- March – Oct.: Selling of carafes and tap water in 30 Restaurants of Lausanne; several representations of this campaign by using the information stand
- September: NGO-event ("Trasguardi") in Lugano organized by FOSIT (handing over of the label by Claudio Valsangiacomo), Lugano
- September: Wassertage Samedan (Presentation of SES mechanisms, handing over of the label with Ernst Bromeis), Samedan
- September: Information Stand at the World Student Environmental Summit, Université de Lausanne
- September: Award of the «Prix PR Eau potable» for the french speaking part of Switzerland, attributed by SSIGE
- October: Closing ceremony of "Lausanne Eau Solidaire" with media coverage
- October: Global Water Solidarity Meeting in Morocco, presentation of project from eauservice
- November: Presentation of SES and partnership of Lausanne at the general assembly of ARCAM (Association de la Région Cossonay-Aubonne-Morges)
- December: Information Stand at the Marché de Noel in Lausanne

*Since July 2011 the mobile stand realized and used during the "Sommet de la Francophonie" in October 2010 with information about solidarit'eau has been used by municipalities to promote Solidarit'eau. The stand is at the moment hosted by **eauservice**.

Formatiert: Zentriert

2.2 Media

- February: La Liberté & Le Courrier : « Carafes d'eau payantes pour projet solidaire »
- March : 20 minutes, Lausanne : « Solidaires avec une carafe d'eau »
- March : Radio, RTS, émission forum
- March : 24 Heures Lausanne : « Une famille lausannoise lance la "carafe solidaire" pour soutenir la Mauritanie »

October : Aqueduc info : « Entre Lausanne et Nouakchott, une carafe d'eau solidaire »
November : 24 Heures Lausanne : « L'eau lausannoise contient encore trop d'herbicides et de médocs »
December: Radio Suisse Romande: Interview with M. Higy from SIGE, addresses SES

Most of the listed publications are available on the website:
http://www.solidariteausuisse.ch/de/artikel.html?no_cache=1

2.3 Forms

2.3.1 Project forms

The project forms are available for download on the solidarit'eau suisse website:
<http://www.solidariteausuisse.ch/de/downloads-links.html>

The project form for submitting new projects was slightly adapted due to a request from Aguasan. The questions have been formulated more clearly and the NGO's are now asked to attach a detailed budget in order to get a more complete dossier to rate. The NGOs were informed by a mailing in October 2012.

2.3.2 Reporting

The reporting form, which NGOs have to fill in at the end of the project guarantees consistent feedback of the projects and enables a high standard to be maintained. The reports are on the website of solidarit'eau suisse.

<http://www.solidariteausuisse.ch/de/projekte/abgeschlossene-projekte.html>

2.3.3 Label policy

Following criteria have to be fulfilled to award the label "municipality solidarit'eau suisse":

- The municipality contributes at least one cent/qm used water
- The amount has to be contributed to a solidarit'eau water project which may contain sanitation aspects or watershed management aspects.

These municipalities are mentioned on the website with a "gold" label.

The municipalities which support projects with less than one cent/qm water do not receive the label. They are mentioned with a "blue" label on the website.

2.3.4 Criteria for the approval of Non-Profit Organisations

In 2009 solidarit'eau suisse created and introduced the following criteria for quality reasons:

- the organisation has to be based in Switzerland
- the organisation has to have a legal form as a non profit organisation
- the organisation has to hold the label ZEWO or is member of one of the federations, which are responsible for the according project
- the organisation has to account for the expertise in the water sector
- the organisation has to commit to follow the rules regarding the project presentation, reporting and finances.
- the organisation has to follow the recommendation for non profit organisations in their accounting and the annual report will be audited by an independent audit company.

During the reporting year these criteria have been consequently applied and there was no evidence to modify/extend them.

2.3.5 Federation Guarantee for small NGOs

In 2011 the SC decided, that small NGOs that can not be accredited by solidarit'eau suisse can let their federation guarantee for their water project. The federation has to sign a form in which it guarantees for a small NGO who can then present a project on the solidarit'eau Suisse platform (after a positive second opinion by the water expert). In 2012, five small NGOs joined solidarit'eau under the guarantee of FOSIT: Associazione ABBA, Associazione Mabawa, Associazione Me-Wa, Multimicros Ticino, Associazione Cooperazione Essere Umani (CEU).

The Federation has to accredit itself by filling in the official solidarit'eau suisse-form and assign a water expert for the second opinion of the projects of small NGOs.

The form and the regulations are on the platform for download.

<http://www.solidariteausuisse.ch/de/downloads-links.html>

2.3.6 Guidelines for private contributions:

In 2011 the SC decided that private financial contribution will be possible, if a municipality asks for financial support of a local company. Solidarit'eau suisse communicates the partnership with the municipality or water supply but doesn't communicate the amount of the contribution of the private company. With the approval of the municipality/water supply the private company can communicate its contribution with the following claim: "Die *Gemeinde X* wurde in ihrem Engagement bei solidarit'eau suisse von *Firma Y* unterstützt." / "La *commune de X* a bénéficié du soutien de l'*entreprise Y* dans son engagement au sein de « solidarit'eau suisse »." / "Il *Comune di X* ha beneficiato di un contributo da parte dell'*azienda Y* nel suo impegno in seno a « solidarit'eau suisse »."

The guidelines are published in the download section of the website.

<http://www.solidariteausuisse.ch/de/downloads-links.html>

3 Cooperation with other institutions

3.1 Cooperation with *Fédérations-romandes*

The Federations agreed to cooperate with solidarit'eau suisse in matters of smaller NGOs without ZEWO label. The process has been defined and is published on the website of solidarit'eau suisse. A water expert of Fédévaco has been accredited by Aguasan in December 2011.

3.2 Cooperation with *FOSIT*

The 'lettre d'intention' of solidarit'eau suisse and the Federations has also been approved by FOSIT. A water expert of FOSIT has been accredited by Aguasan in December 2011.

3.3 Cooperation with *SVGW*

The secretariat sent a letter to all Water suppliers in Switzerland to motivate them to contribute to a water project of solidariteau suisse. The SVGW cooperated with a list of all their members and agreed to co-sign the letter. The mailing was sent out in March 2012 with reference to the World Water Day on the 22nd of March.

3.4 Public-Public Partnerships supported by *SDC*

The public-public partnership is a long-term partnership between Swiss municipalities/utilities and municipalities/utilities in developing countries. This partnership should go beyond the implementation of a specific project but also include capacity development of the Southern Partner, know-how transfer and mutual exchange between both partners. Currently two Swiss municipalities (Lausanne and Münsingen) maintain such a partnership. SDC has earmarked in total CHF 100'000 to top-up the funding of Swiss municipalities for such public-public partnerships.

Since the launching of the partnership between eauservice Lausanne, the water utility of Lausanne, and the Communauté Urbaine of Nouakchott (CUN) in Mauritania in 2009, 14 other municipalities have joined the partnership. Thanks to the contribution of these municipalities, the budget of Lausanne doubled for 2012 (270'000 CHF).

An awareness raising and fundraising campaign called "Lausanne Eau Solidaire" raised additional 57'000 CHF. For 6 months, a carafe of water was sold 2 CHF in Lausanne's 28 restaurants. The specially designed carafe and its glass were sold for 30 CHF.

Given the good results obtained in a first project, the CUN and eauservice decided to set up a second project called PCAE (Projet Communautaire pour l'Accès à l'Eau). This three year project begun in November 2011 and aims at improving access to water for disadvantaged populations. SDC supports this new public-public partnership project through a singular additional credit.

4 Status of NGO projects

In 2012, the WaterKiosk Foundation joined the initiative and presented a water project on the website.

To keep the balance between smaller and bigger NGOs, an organisation can not have more than five project proposals on the website at the same time.

During the year of 2012 *H2O-Energies* and *Kommission für In- und Auslandhilfe* and *Swissaid* could implement one or more projects thanks to the support of solidarit'eau suisse. Projects from other organisations could be partially financed.

By the end of 2012 the following development agencies have projects on the solidarit'eau suisse website, which still seek funds:

Development agency	Project on website	Country
Association Morija	WASH Burkina	Burkina Faso
ABBA	Programma approvvigionamento acqua	Burkina Faso
Ass. Mabawa	Acqua per tutti: Allacciamento della collina Nyakanyinya alla rete idrica di Nyamyumba	Ruanda
Associazione Svizzera-Cuba (ASC)	Camagüey, Cuba: potabilizzazione dell'acqua con filtri in ceramica in una comunità rurale.	Kuba
Caritas Schweiz	Zugang zu Wasser verbessert Hygiene, Gesundheit und Ernährung	Äthiopien
Caritas Schweiz	Arme Bauernfamilien ethnischer Minderheiten verbessern ihre Lebensbedingungen dank besserem Zugang zu Trinkwasser und sorgfältigerem Umgang mit Wasser	Vietnam
Caritas Schweiz	Somaliland: Die Bevölkerung baut mit Unterstützung von Caritas Wasserversorgungen, Dorfschulen und lernt Krankheiten vorbeugen	Somalia
Caritas Schweiz	Mali: Nachhaltige Ernährungssicherung und Trinkwasserversorgung auf dem Plateau Dogon durch den Bau von Kleindämmen für den bewässerten Zwiebelanbau (Echaloten)	Mali
Caritas Schweiz	Nicaragua: Dörfer entwickeln sich nachhaltig	Nicaragua
Caritas Schweiz	Natürliche Felsbecken werden zu Wasserreservoirs ausgebaut	Sudan

eauservice - Ville de Lausanne	Projet Communautaire pour l'amélioration de l'accès à l'eau potable à Nouakchott, Mauritanie	Mauretaniien
Fondazione Svizzera Madagascar	Ristrutturazione e manutenzione straordinaria	Madagaskar
Fondation Terre des hommes	Amélioration de la santé des femmes et des enfants l'Upazila Thanchi - Union Thanchi Sadar - Bandarban dans les Chittagong Hill Tracts (CHT) au Bangladesh	Bangladesh
Associazione Me-Wa (Fosit)	Costruzione castello d'acqua potabile a Djego-Gbahou - Rep. del Benin	Benin
Associazione ABBA (Fosit)	Programma approvvigionamento acqua - Burkina Faso	Burkina Faso
Associazione Mabawa (Fosit)	Acqua per tutti: Allacciamento della collina Nyakanyinya alla rete idrica di Nyamyumba	Ruanda
Multimicros Ticino (Fosit)	Costruzione di un piccolo acquedotto per la comunità AWÀ di Palmira di Toctomi	Ecuador
CEU (Fosit)	Realizzazione acquedotto nel villaggio di Marougoune	Senegal
HEKS	Fluorfilter für sauberes Trinkwasser in Äthiopien (Projektphase 2)	Äthiopien
Helvetas	AJIN: Trinkwassermanagement und Siedlungshygiene in drei Gemeinden in Guatemala (GA38)	Guatemala
Helvetas	Wasser und Hygiene auf Haushaltsebene	Vietnam
Helvetas		Burkina Faso
IAS	Adduction électro-solaire d'eau potable à Bazoulé, Burkina Faso	Burkina Faso
IRHA	Ecoles Bleues Ikorodu, Nigéria	Nigeria
IRHA	Ecoles Bleues Boubanza Modul 1 & 2	Burundi
Kam for Sud	Approvvigionamento in acqua con sistema di pompaggio fotovoltaico, sistemi di trattamento delle acque luride e ricupero delle acque piovane per l'orfanotrofio-fattoria di Tathali, Nepal (CHOT, "Children Home Tathali")	Nepal
SRK	Sauberes Trinkwasser und verbesserte Hygiene	Nepal
SWISSAID	Eau potable et mesures d'assainissement pour des communautés rurales de San Dionisio, Metagalpa (Réf: NC 2/11/13)	Nicaragua
SunDance	Neues, vergrößertes Wasserreservoir in Boukayatte (5 km ausserhalb Timbuktu /MALI)	Mali
SunDance	Dörfliche Wasserversorgung mit einer solar betriebenen Trinkwasseranlage in Tonokalacoro / Sikasso / Finkolo /MALI	Mali
TIM Suisse et France Voisine	Projet de désinfection de l'eau à Madagascar	Madagaskar
Wakina Mama na Watoto	Trinkwasserprojekt Mlangali, Mbozi District, Tansania	Tansania

Water Kiosk Foundation	Trinkwasser an Schulen in den Usambara Bergen (Tansania)	Tansania
------------------------	--	----------

The following list shows the projects that have been **financed** (not yet realised) in 2012 thanks to the support of solidarit'eau suisse:

Development agency	Project	Country
Associazione Me-Wa	Costruzione castello d'acqua potabile a Djego-Gbahou	Benin
CEU - Associazione Cooperazione Essere Umani	Realizzazione acquedotto nel villaggio di Marougoune	Senegal
eauservice - Ville de Lauseanne	Amélioration de l'accès à l'eau potable à Nouakchott, Mauritanie	Mauretanie
H2O-Energies	Projet Kenya site de Koteyo	Kenia
H2O-Energies	Ville de MBOUDA - Source des "24 ESCALIERS"	Kenia
HEKS	Einführung von kostengünstigen Techniken zur Fluoridentfernung für Haushalte und Gemeinden in Oromia / Rift Valley, Äthiopien	Äthiopien
Kommission für In- und Auslandhilfe (KIAH)	Rehabilitierung der Wasserversorgung Ihazolava, Vakinankaratra	Madagaskar
IRHA	Ecoles Bleues Ikorodu	Nigeria
Singla-Népal	Adductions d'eau dans le district de Khotang	Nepal
SWISSAID	Bessere Lebensbedingungen durch Zugang zu Wasser (NI 2/07/08)	Niger

The following projects have been **implemented** in 2012 thanks to the support of solidarit'eau suisse:

Development agency	Project	Country
Caritas Schweiz	Äthiopien: Sauberes Wasser verbessert Gesundheit und Hygiene	Äthiopien
Caritas Schweiz	Südsudan: Sauberes Wasser für Ikotos	Sudan
Fondazione Svizzera Madagascar	EAU POTABLE POUR TOUS	Madagaskar
H2O-Energies	Projet Kenya - Site de Bondo	Kenia
HEKS	Einführung von kostengünstigen Techniken zur Fluoridentfernung für Haushalte und Gemeinden in Oromia / Rift Valley, Äthiopien	Äthiopien
Helvetas	AJIN: Trinkwassermanagement in drei Gemeinden in Guatemala (GA38)	Guatemala

Helvetas	Wasser und Siedlungshygiene im ländlichen Gebiet der Provinzen Cabo Delgado und Nampula in Moçambique	Mosambik
SRK	Trinkwasserversorgung in der Präfektur Shigatse, Autonome Region Tibet, China 2009-2011	China
SWISSAID	Trinkwasser, verbesserte Hygiene und Gesundheit für 11 Gemeinden in der Provinz Chimborazo (Ref. EC 2/08/01)	Ecuador
SWISSAID	Bessere Lebensbedingungen durch Zugang zu Wasser (NI 2/07/08)	Niger

5 Participating Municipalities

5.1 Swiss map with participating municipalities

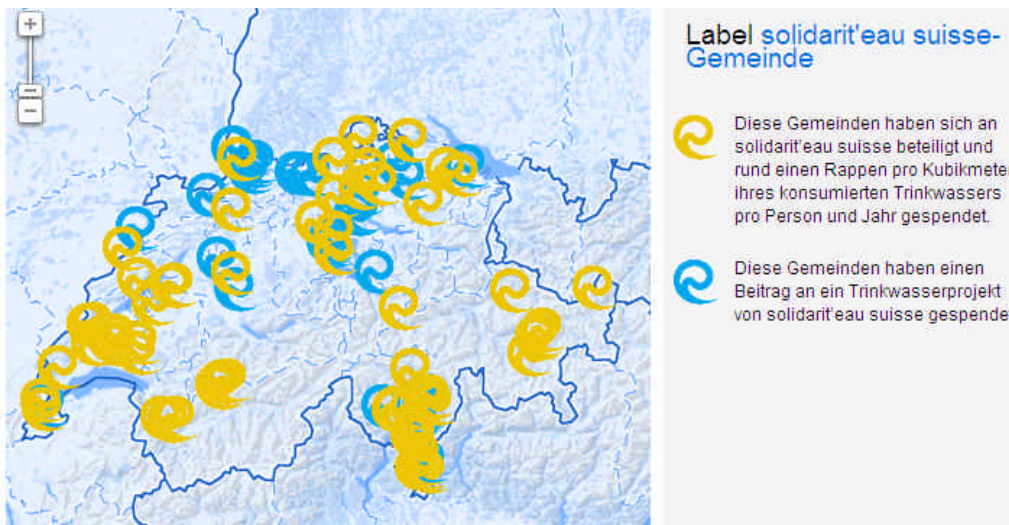

Fig.: Participating municipalities and water utilities in 2012. The Interactive map with explanation in French, German and English is available on the website <http://www.solidariteausuisse.ch/de/solidariteau-suissegemeinden/unterstuetzende-gemeinden.html>

5.2 Amount of participating municipalities

For lack of space the following list shows the contributions for only the last three years (2010 / 2011 / 2012). For an overview of all contributions, see the previous annual reports or the Swiss map on the solidarit'eau suisse website with search function.

Municipality	Amount 2010	Project 2010	NGO 2010	Amount 2011	Project 2011	NGO 2011	Amount 2012	Project 2012	NGO 2012

In this list shows only contributions made from municipalities via the secretariat to the NGOs; money directly donated by municipalities to the NGOs for projects presented at the platform of solidarit'eau suisse are sometimes not actively communicated to the secretariat of solidarit'eau suisse. The total amount received from water services or municipalities for solidarit'eau suisse projects can be therefore extrapolated to 1.5 – 2 time of the total amount indicated in the list.

Zurich, 21 February 2013 / SGE, UBU, TST
